

Innovative solutions for a healthier practice

HOW MDS CAN HELP

Maximize your investment – We can evaluate and train your staff to effectively use Allscripts, provide interim Allscripts-proficient staff within your organization, and provide actionable analysis on how your staff and systems can be optimized to reduce provider frustration, and improve efficiency.

Experience counts – Our consultants can quickly spot opportunities to improve your clinical and administrative processes. Automate tasks within the system, and report on what is still to be done. What's more, we have done it before – you are not our consultants' test bed.

Optimize your technology – Whether you're trying to get more from your current Allscripts Enterprise installation, looking to migrate to the latest version, or just beginning to implement an EHR in your practice MD Solutions stands ready to advise, integrate, implement, and optimize.

ABOUT OUR COMPANY

Founded in 2000 by industry veteran Paul Casey, MD Solutions' mission is simple—to provide healthcare organizations with the means to maximize efficiencies and profitability by effectively using their people, processes and technology.

The MD Solutions team is comprised of diverse healthcare and technology industry veterans that understand the business of ambulatory healthcare. The company is based in Boston, Massachusetts and serves clients in 34 states.
