

MEANINGFUL USE REQUIRES PROVIDER “USE”

Besides the obvious American Recovery and Reinvestment Act (ARRA) incentives (incentive payments ranging from \$44,000 to \$64,000 per physician over five years begin in 2011) the features and functions offered in v11.2 are significant as compared to v10:

- The customizable, intuitive and flexible clinical desktop makes it easier for providers to manage patient care, all from a single screen
- v11 note templates and customizable flow sheets offer the potential for tremendous increases in efficiency for providers
- Provider specific tools allow for quick assessments and documentation of patient encounters
- Electronic provider workflows increase efficiency and increase visibility into the patient record

A COORDINATED PATH TO SUCCESS

Our experienced consultants can take you through the upgrade process in a way that minimizes disruption to your practice, while offering the best chance for physician/staff adoption. What’s more, our consultants have the experience and the foresight to ask the right questions—in advance—so that your Allscripts’ implementation is not only successful, but efficient.

IT’S ABOUT YOUR PEOPLE TOO

The more comfortable your staff (including physicians) is with Allscripts v11, the more they will embrace the enhanced capabilities and the greater the benefits will be for your practice. Beyond technical expertise, MD Solutions provides the essential training that can help ensure your success.

INCENTIVES AND COMPLIANCE IMPLICATIONS

Next year marks Phase 1 of HITECH incentives offered under the ARRA for Medicare/Medicaid providers. Ensuring that the system you choose meets the Meaningful Use standards is important and just as important is getting your providers to use the system. Our team has the knowledge and experience to partner with your providers to get them to not only use the system, but to embrace it.

Summary – Reaping the benefits of Allscripts Version 11 and getting your technology efforts aligned with Federal incentives can be streamlined and assured when you get help from experienced professionals.
