

WE DON'T JUST TRAIN ALLSCRIPTS' USERS, WE EMPOWER THEM

Effective training is essential to realizing the business-transforming potential of Allscripts' products. MD Solutions' has been training medical office staff since our inception ten years ago. To be successful training this workforce you need to understand what the various roles are within a practice and you must deliver the information the staff needs in a way that matches their learning style.

HOW MD SOLUTIONS' APPROACH TO TRAINING IS DIFFERENT

We understand the principles of adult learning – Training is always more effective when you understand the needs of the participants and their learning style. The way you train front office staff on tasking is very different from how a physician is trained on documenting an encounter. MD Solutions' trainers are experts in adult education and the products that they train.

We focus on the practical – Our training takes into account the way people really work—and the way they really learn. We understand training budgets and can help stretch yours. We begin with a learning assessment and tie all of our training back to measurable goals. Our programs have been refined over the years to ensure you see measurable results with minimum disruption to your practice.

Training materials are customized for your practice and are meant to offer an easy reference for your staff after the training is complete. Computer based training, remote and in-person live training is available to meet your practices' needs.

CONTACT US TODAY!

Learn more about how the right training strategy can transform your practice by encouraging adoption and ensuring that every user realizes the full value of your technology investments.
